

# SPOOKY VIRAL LAB

(50 points)

You have just discovered the virus for zombism / vampirism / lupinism (werewolf). Your job is to describe this newly discovered virus so the rest of the world will be aware of the dangerous viral threats.

You must include:

- Common and scientific name of the virus
- The host organism
- Family of viruses - what virus is it similar to? How is it similar?
- How the virus is contracted/spread
- Symptoms of the virus from start to finish (minimum of 3 stages of symptoms)
- Treatment or cure or vaccine available
- Drawing of the virus
- Drawing of a victim

Once you have gathered your information you will create an informational, medical brochure on the virus. This MUST be high quality and grammatically correct. ALL of the information above MUST be included in your brochure. You MUST add color to the brochure.

For extra credit (up to 20 points) you may do one of the following:

- PSA (public service announcement video)
  - 3D model of the virus
- news report on a viral outbreak

**EVERYTHING** is DUE MONDAY Nov. 3 by the  
**END OF the DAY**

(no exceptions)
